PROFILE SUMMARY

Software Engineering graduate with hands-on experience building responsive web applications, backend systems and full-stack solutions. Strong foundation in object-oriented programming, data structures, database integration and system design. Experienced in collaborative, Agile project environments with a proven ability to translate business requirements into practical, user-centered digital solutions. Passionate about continuous learning, innovative technology and contributing to meaningful software products.

Technical Skills

Frontend: HTML5, CSS3, JavaScript, Tailwind CSS

Backend: Python, Java, SQL, Firebase, Supabase, Flask, Django

Mobile: Dart, Flutter

Tools & Platforms: Git, GitHub, Docker, AWS (basic), VS Code, IntelliJ J, PyCharm, Microsoft Office Suite

Competencies: OOP, Data Structures, Agile/Scrum, CI/CD, API Integration, Technical Documentation, Version Control

EDUCATION

Occupational Diploma in Software Engineering – WeThinkCode_ | Sept 2024 – Dec 2025

National Senior Certificate (Grade 12) - Kimberley Technical High School | Jan 2019 – Dec 2023

CERTIFICATIONS

WeThinkCode_ GenAI Course for Engineers | WeThinkCode_ | 2025

Full Stack Development | FNB App Academy | 2025

PROJECT EXPERIENCE

Cache Bank Landing Page | HTML, Tailwind CSS, JavaScript - Designed and built a modern developer-focused banking landing page with dynamic JavaScript interactions and a clean responsive UI. Demonstrates strong frontend development and attention to user experience.

Salon Appointment Booking website | HTML, CSS, JavaScript - Built a fully responsive booking platform solving a real problem faced by small businesses managing appointments manually. Features service selection, booking forms and deposit payment functionality.

Chess Board Visualizer | Python - Developed a simple program that parses FEN strings and renders dynamic chessboard states. Demonstrates clean code structure and strong problem-solving ability.

Robot Worlds System | Java, SQL, Docker A multi-client backend application built and enhanced within a collaborative Agile team environment. Implemented server-side logic, SQL database persistence and CI/CD automation. Containerized the entire system using Docker, demonstrating practical knowledge of scalable backend architecture and DevOps practices.

VOLUNTEER EXPERIENCE

Bootcamp Assistant - WeThinkCode_ | Sep 2024 – Dec 2025

- Provided technical support and guidance to bootcamp students working through complex programming concepts.
- Assisted bootcampers with any technical queries and troubleshooting.
- Supported student onboarding, ensuring a smooth and positive introduction to the program.
- Maintained clear communication across teams to ensure students received timely and accurate support.

Placements Facilitator - WeThinkCode_ | Sep 2024 – Dec 2025

- Coordinated workshops, career fairs and tech events end-to-end in collaboration with the placements team
- Tracked progress, managed resources and ensured all logistical needs were met for each event.

WomenThinkCode Secretary - WeThinkCode_ | Sep 2024 – Dec 2025

- Managed all program documentation including reports, correspondence and meeting records.
- Coordinated events and initiatives supporting female students in tech.
- Maintained organized and accurate records across multiple concurrent programs.
